By combining the unique properties of the TATRA chassis with the fire superstructures of modern construction, firemen are given a unique high standard tool for their work. The “TATRA CONCEPT”, along with the ground clearance regulation and 1,200 mm fordability, ensure serviceability both in normal conditions and in emergency situations.

Excellent off-road mobility, high transport speed, and driving comfort for both the crew and the carried superstructure are standard.

Fire superstructures made by THT, s.r.o. are made of aluminum profiles which ensure their low weight, high strength, and corrosive resistance. The arrangement and variable installation of the fire accessories are designed individually according to the fire brigade’s needs.

The heart of THT fire superstructures is a high-quality pump, together with a foam proportioning system, roof-mounted or bumper-mounted monitor, light mast, electric generator, cable winch, and other components necessary for good and effective intervention.

The THTronic – fire superstructure control system using CAN bus – is offered to demanding users. The system allows comfortable and safe operation, for several operations to be joined in only one action, rejection of any attempt to adjust conflicting and dangerous actions, central diagnostics, and easy fault identification, thus significantly extending the service life of the fire-fighting vehicle.

EXCELLENT OFF-ROAD MOBILITY
FAST AND COMFORTABLE DRIVING
STABILITY, RELIABILITY, SAFETY
SERVICEABILITY EVEN
IN EMERGENCY SITUATIONS
ENGINE
Type: TATRA T3D-92B-3 EURO V
No. of cylinders: 8
Swept volume: 12,667 cm³
Power (net): 325 kW/1,800 rpm
Torque (net): 2,100 Nm/1,100 - 1,200 rpm
Exhaust fumes, SCR

TRANSMISSION
Type: TATRA 14TS 210 synchronized
Počet stupňů: - forward: 14, reverse: 2

TRANSFER BOX
Type: TATRA 2.30 TRS 2.91 (1.24)
Two-speed, increasing the number of transmission gears.
Semiautomatic NORGREN gear control with a possibility of optional gear control.

PTO
Type: TATRA 1TP300K-CH as option

FRONT AXLE
Steerable, driven with swinging half-axles, front-drive disconnect, axle differential lock, air springs, telescopic shock absorbers, adjustable clearance.

REAR AXLES
Driven, with swinging half-axles, axle differential locks, inter-axle differential lock, air springs with telescopic shock absorbers, stabilizer bar, adjustable clearance.

STEERING
LH two-circuit compact steering.

BRAKES
Four separate brake systems: service brake with a load-related automatic adjustment system and ABS, emergency brake, parking brake, relief brake

TYRES, DISCS
Tyres: 14.00 R20
Discs: 20-10.00 V

CAB
Cab-over-engine type, medium size, tilting, AC unit, separate diesel heater, 2-4 seats.

FUEL TANK
220 litres + 67 litres of AdBlue, optional 220 litre tank

DIMENSIONS
Width: 2,550 mm
Wheelbase: 4,090 + 1,450 mm
Track: front / rear
Adjustable clearance under the axle: 360 mm (+90 / -120 mm)

WEIGHT
Payload: 15,430 kg
GVW: 26,000 kg

ELECTRIC EQUIPMENT
Circuit voltage: 24 V
Battery: 2x12V 180 Ah
Generator: 28 V/55-80 A

PERFORMANCE
Climbing ability at 18,000 kg: 99.9 %
Top speed: 110 km/h
Turning circle diameter (curb to curb): 19:1.0 m

WATER TENDER
Model: CAS EN 1846-1 S-3-4-9-000-10/3,000-1
The CAS 30 - T 815-7 6x6.1 Water Tender is designed to carry a fire crew (+3) with accessories necessary for fire fighting interventions with application of water or foam using low or high water pressure.

TECHNICAL DATA
Length (without a cable winch): 9,190 mm
Width: 2,550 mm
Height: 2,860 mm
Fordability: 1,200 mm
Curb weight: 14,950 kg
GVW: 26,000 kg
Water tank capacity: 9,000 litres
Foam concentrate tank capacity: 540 litres

PUMPING EQUIPMENT
Low-pressure
Rated flow rate: 3,000 lpm
Rated pressure: 1.0 MPa
Rated suction lift: 3 m

High-pressure
Rated flow rate: 250 lpm
Rated pressure: 4.0 MPa

HOSE REEL
Hose dimensions / Rated flow rate: DN 25/60 m / 200 lpm
Branch pipe gun type, allowing the flow rate and discharge cone control

OPTIONS
- THTronic electronic foam proportioning control system
- CAN Fire Basic control and checking system with a color multifunctional display
- Monitor
- Bumper-mounted monitor
- Additional hose reel with a DN 25/60-m hose and a gun type branch pipe
- Front nozzles for fire fighting operation on the fly
- Electric recovery cable winch
- Light mast
- Electric generator
